Setting up a PCloud account for use with Safetyminder

Go to PCloud.com and sign up for a free account
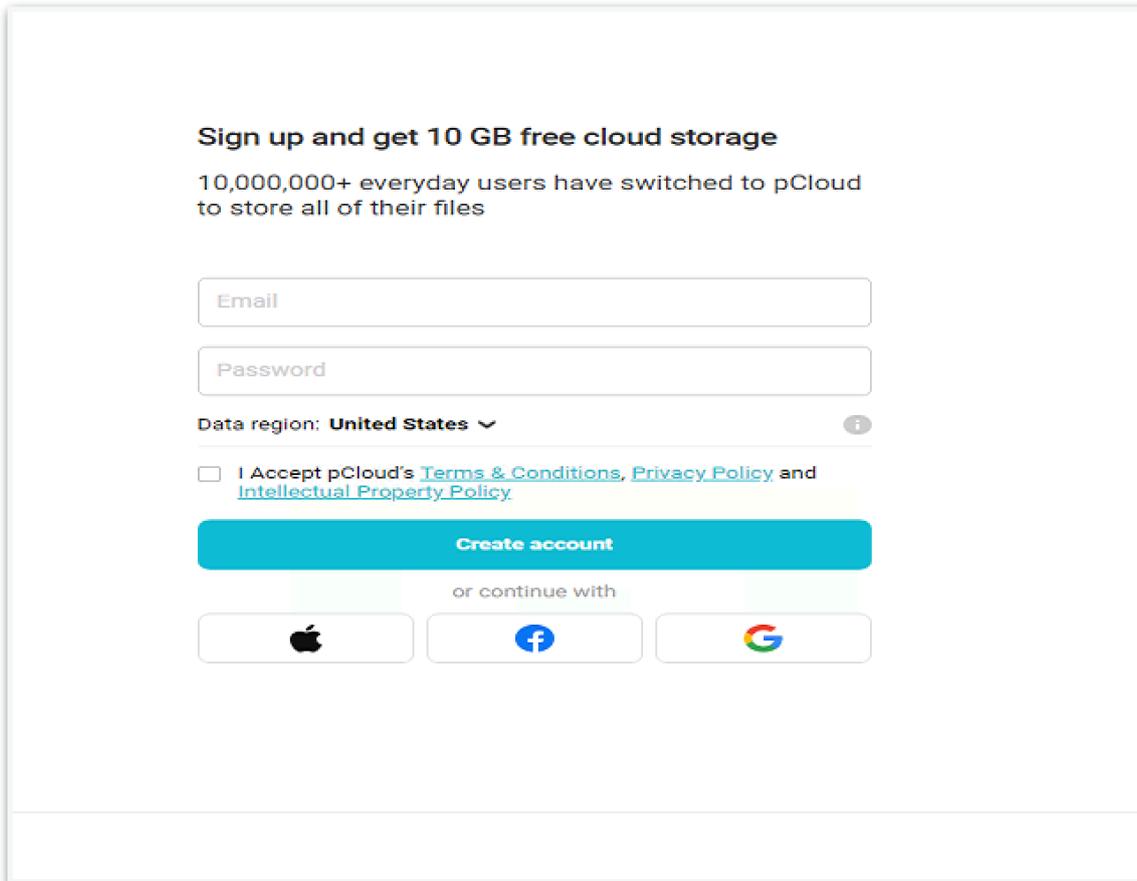

Fill in your email and choose a strong password (please remember it, as we will have no record)
Leave the region as United States
Tick the "Accept PClouds Terms and Conditions"
Click on Create Account
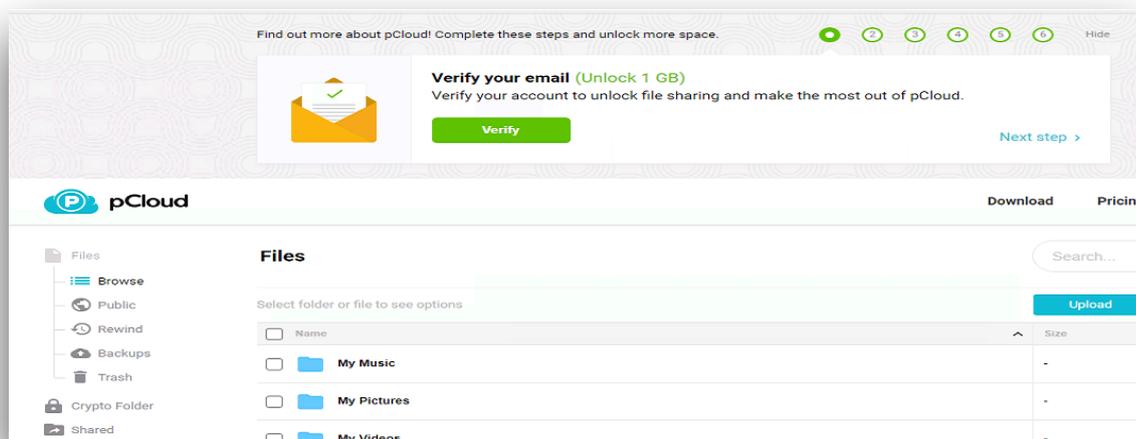

This will open a web page and take you to your account (please note! YOU MUST verify the account otherwise your login will be disabled after a few days)

An email would have been sent to the email address you used to create the account
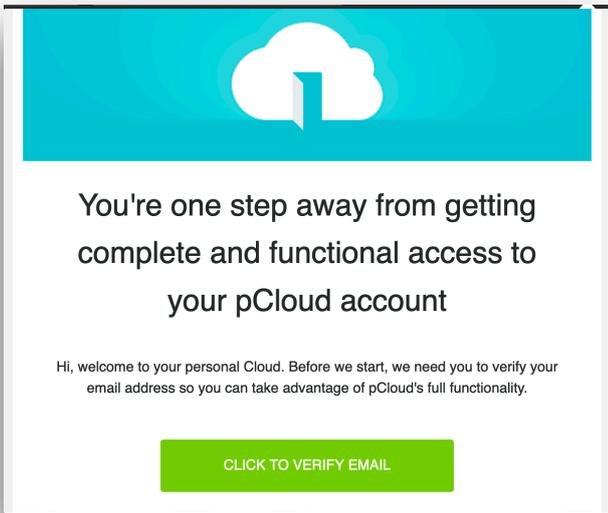

The email will look similar to as at left

Click the "Click to verify email" button

You will see a verified message (in a web page).
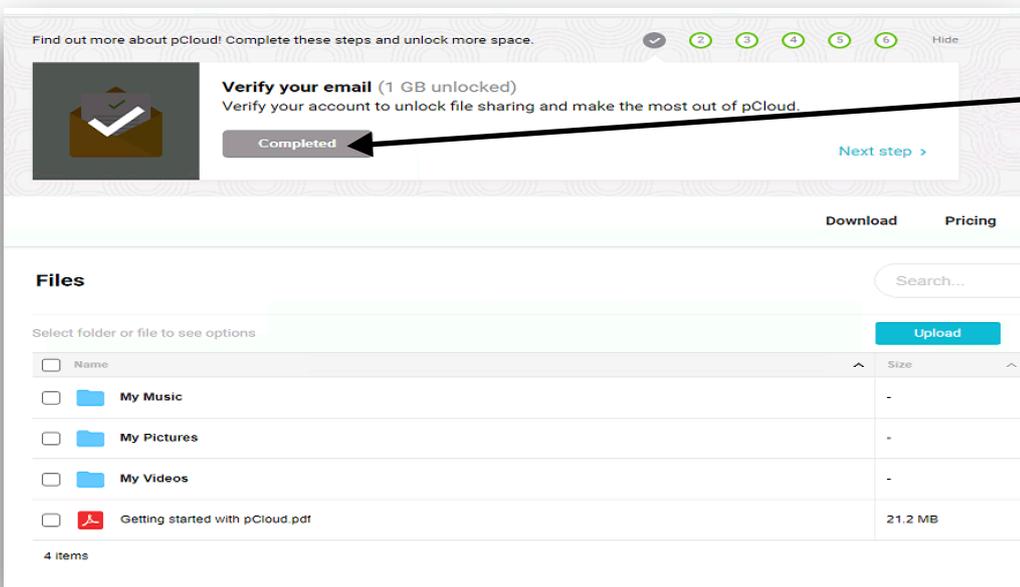

In the account page you will see that the "Verify your email" has "Completed" below it.
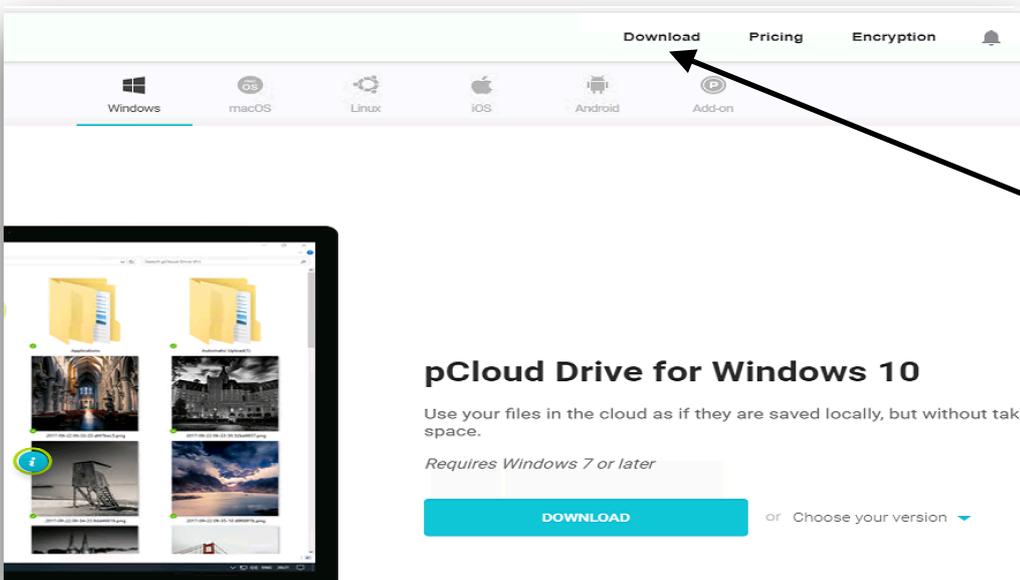

Now click on the "Download" Word (as at left)
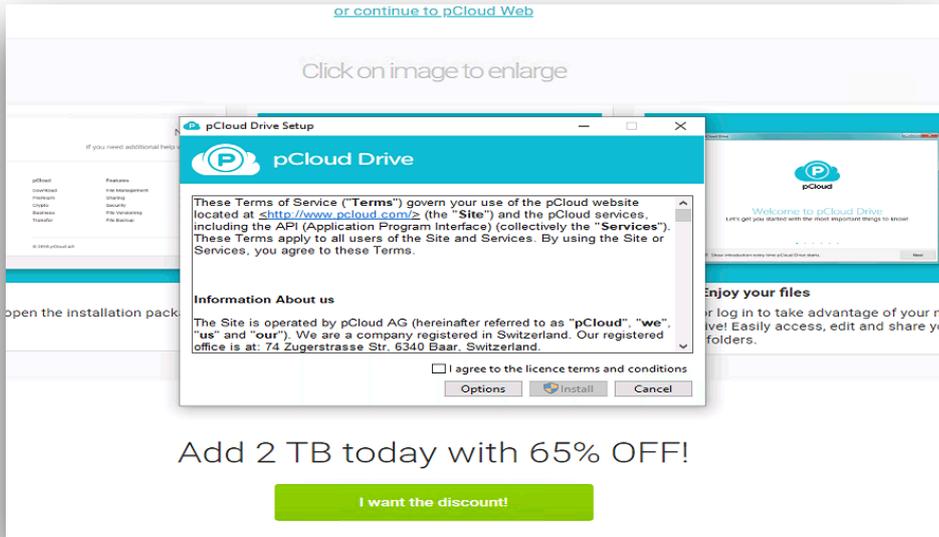

Download the file and run it.

Tick the "I agree to license terms and conditions"

Then click the "Install" button
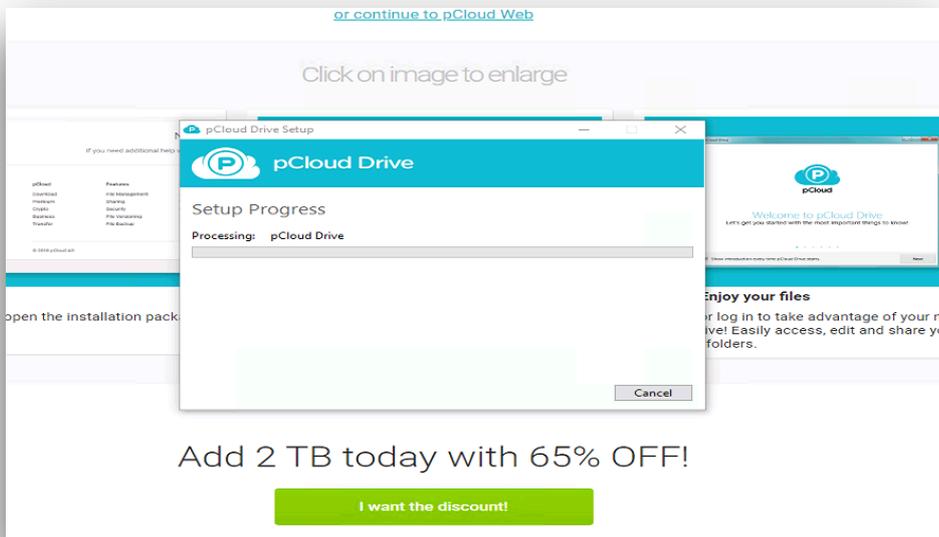

The program will install
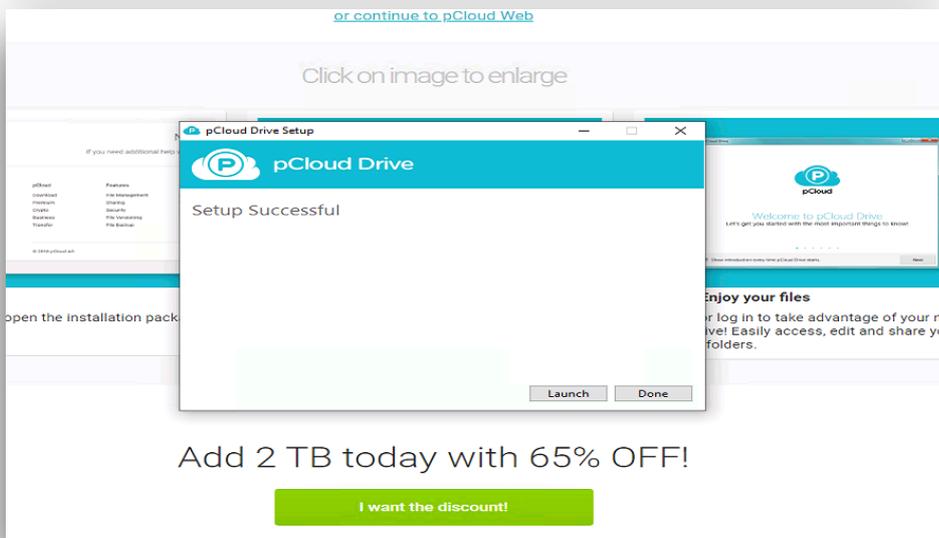

When finished you should see a message as at left

Click on the "Launch" button
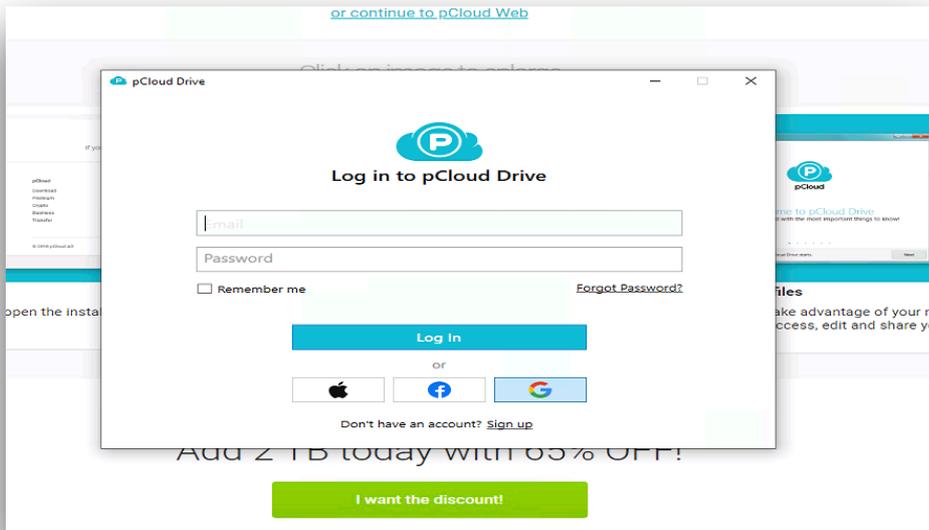

You will see the login screen, login again with the details used to create the account, **do not forget to tick the "Remember me" checkbox**

Click on "Log In"
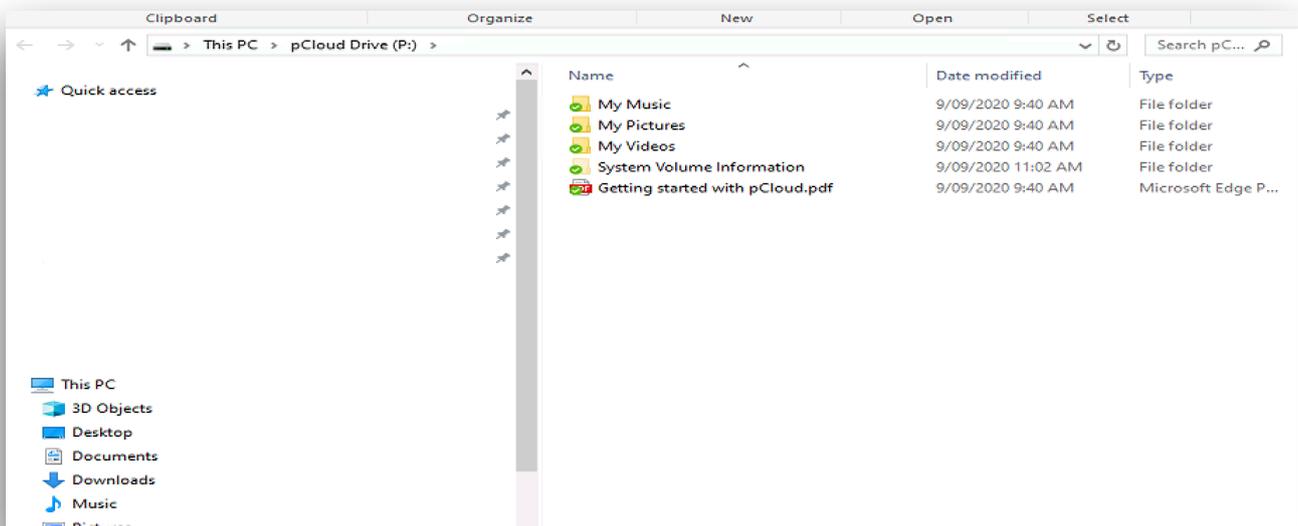

The process creates a virtual "P Drive" on your computer. Ie when logged in and connected to the internet the files will be available. The drive itself uses minimal space on your hard drive.
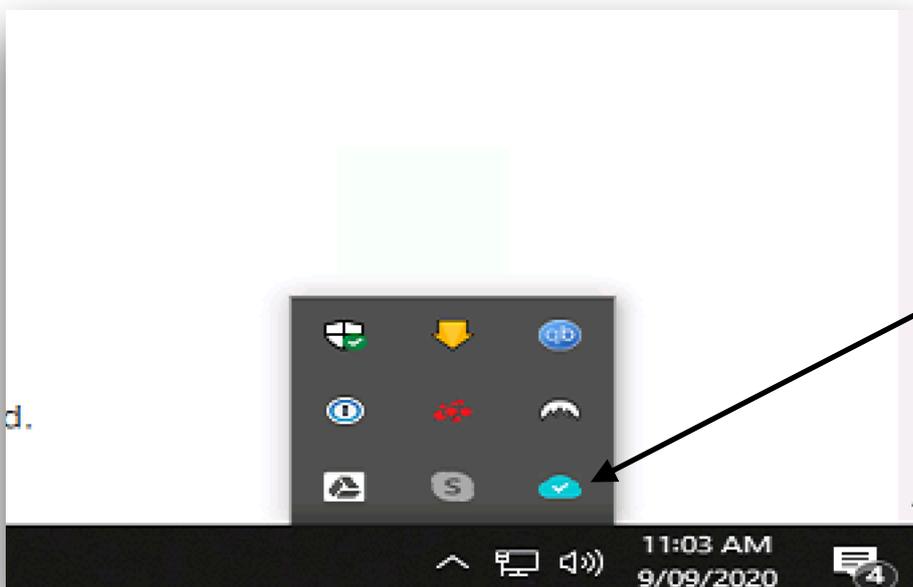

When connected and logged in you will see the PCloud icon in blue. If not logged in (or no internet) it will be grey.

User kevin.woods@safetyminder.com.au just shared the folder "Documents" with you.

In order to access the folder, accept the invite. If you don't have a pCloud account, you'll be prompted to sign up.

ACCEPT INVITE

Thank you for trusting pCloud with your files!

Best wishes,
The pCloud team
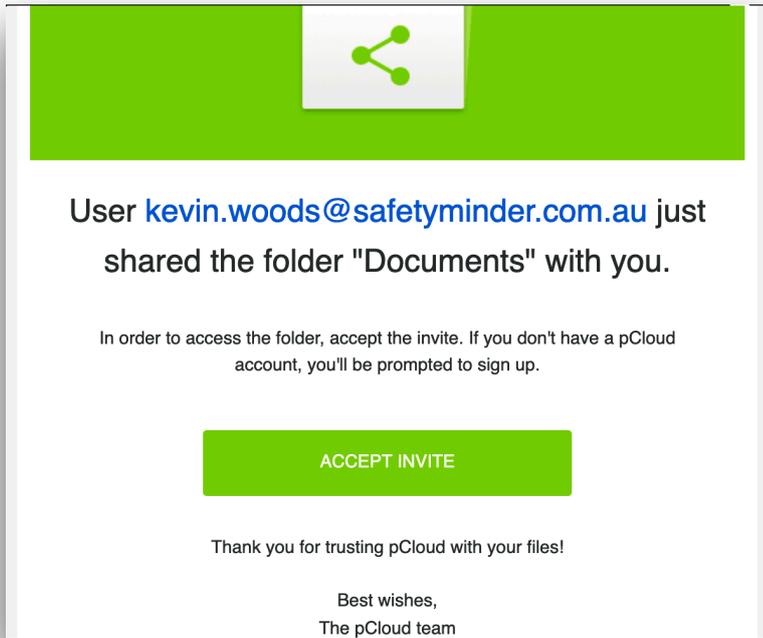

We would have sent you 2 further emails (from PCloud) that creates the shared folders

"Upload" and "Documents"

Click on "Accept Invite" on each email

When Accepted you can view in the "Shared" folder of the online web folder or the local "Pdrive" Folder as shown in the following

And in the local P Drive
