

# QR Codes

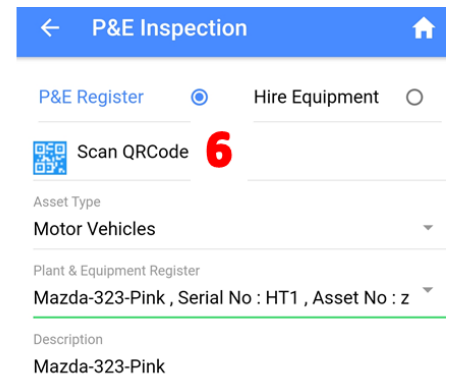

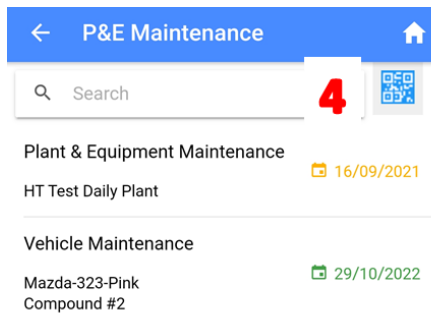

1. On the home page click the QR Scan button. This will open your camera to scan the assets QR Code.
2. The P&E Summary will display with any tasks assigned to you for this item.

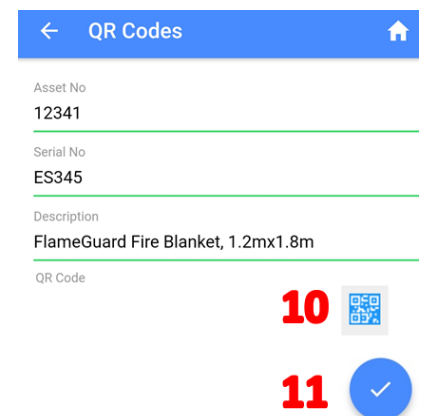

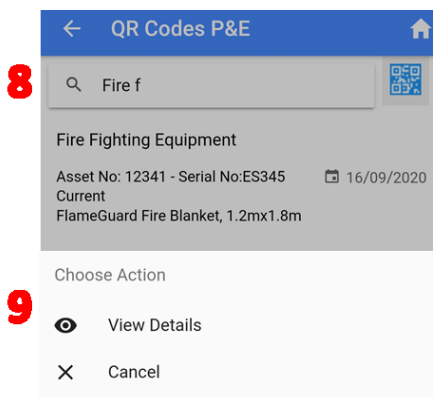

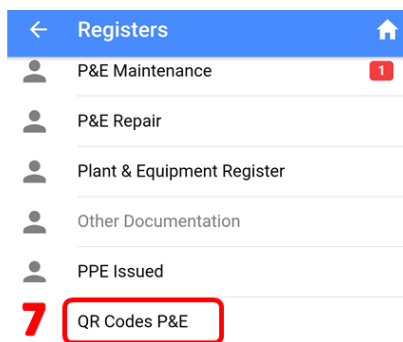

3. When you click on the asset description a list of actions will be displayed. Clicking on them will open the appropriate register for you to complete as normal.

4. In each of the P&E registers you can now click on the QR Code icon & scan the asset.
5. Safeyminder will then show you a list of tasks in that register for this asset.
6. When creating new tasks in these registers you can also click and scan the QR Code to populate the asset details.

7. To add codes to plant & equipment click on QR Codes P&E from the Register menu.
8. For items that do not have QR Codes type in the search field to narrow down the selection.
9. Click on the item you wish to add a QR Code to and select View Details.
10. Click on QR Icon and scan the code.
11. Click to save.
